PROJECTS

LuxeStay – Hotel Booking Platform

Booking Website | **Frontend Developer & Backend Contributor**

GitHub: https://github.com/hnc144210/SE104.Q11_LuxeStay

- Architected and developed the entire frontend interface using React.js and Tailwind CSS.
- Collaborated on backend development using Node.js and Express.js to ensure seamless data flow.
- Implemented data storage and retrieval solutions utilizing Supabase (PostgreSQL).

SportGear E-commerce & Social Platform

E-commerce Website | **FE and BE developer**

GitHub: <https://github.com/ducpham211/SportGear-E-commerce-Platform>

- Engineered a full-featured web application allowing users to purchase football accessories.
- Developed a real-time messaging system for private and group chats using WebSockets.
- Integrated secure online payment gateways using MoMo to facilitate end-to-end e-commerce transactions.

Prepare your work

Task Management App | **FE and BE developer**

GitHub: <https://github.com/ducpham211/Prepare-your-work->

- Built a server-side rendered application using Node.js and Express.js with EJS for dynamic interface templating.
- Implemented full CRUD functionalities allowing users to efficiently create, update, and manage daily tasks.
- Integrated Supabase (PostgreSQL) to handle persistent data storage and optimize database interactions.
